### Abstract:

This authoritative volume (along with its companion on vulnerability), resulting from the work of the Assessments of Impacts and Adaptations to Climate Change (AIACC) project launched with the IPCC in 2002, is the first to provide an in-depth investigation of the stakes in developing countries. It covers current practices for managing climate risks, deficits between current practices and needs, the changing nature of the risks due to human caused climate change, strategies for adapting to changing risks, and the need to integrate these strategies into development planning and resource management. The book also identifies obstacles to effective adaptation and explores measures needed to create conditions that are favourable to climate change adaptation. -- Publisher's description

### Resource Description

#### Exposure :

weather or climate related pathway by which climate change affects health

Unspecified Exposure

#### Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

#### Geographic Location:

resource focuses on specific location

Global or Unspecified

#### Health Impact:

specification of health effect or disease related to climate change exposure

General Health Impact

#### Mitigation/Adaptation:

# Climate Change and Human Health Literature Portal

mitigation or adaptation strategy is a focus of resource

Adaptation

**Resource Type:** 

format or standard characteristic of resource

Policy/Opinion, Review

**Timescale:** 

time period studied

Time Scale Unspecified
